

# One-Stop Shopping for All Your Filtration Needs

It's important to know that the cartridge filters and filter bags you buy will fit perfectly with the vessels you have. It's equally important to know that the vessels you order will have extra filters available whenever you need them, so you won't be left holding the bag.

• That's why Filter Specialists is the best place to go for all your liquid filtration needs. We carry a complete line of cartridge

**FDA** filters, filter bags and absorbent filter media. And we make everything needed by the liquid filter industry, from filters and vessels to unique-application filters and custom-designed vessels. • At FSI, we are completely vertically-integrated. We extrude our own fiber, needles and felts, spin our own yarns, mold our own injected plastic components, sew or weld all our own bags, manufacture our entire cartridge line, and engineer and fabricate all our own filter housings and related equipment. • And as a one-source supplier, FSI uses integrated technologies to ensure that all facets of liquid filtration are as efficient as possible, and that all our components meet FSI's high quality expectations.

• So when you need anything for your liquid filtration line, think of FSI. We have everything you're shopping for – except the double-back coupons.

Filter Specialists, Inc.

P.O. Box 735, Michigan City, IN 46361 • Fax: 219/877-0632 • <http://www.fsifilters.com>

It's nice to know you get what you pay for, but it's even better when you get more than you paid for. You don't want just the bare minimum. You want filters that surpass the most stringent standards, and vessels that deliver the highest quality product flow, at the most economical cost. •

That's why Filter Specialists is the place to go for all your liquid filtration needs. We put extra care and attention into everything we manufacture, from our complete line of cartridge filters, filter bags, absorbent filter media and vessels, to unique-application filters and custom-designed vessels.

• At FSI, we pride ourselves on being completely vertically-integrated. We extrude our own fiber, needles and felts, spin our own yarns, mold our own injected plastic components, sew or weld all our own bags, manufacture

our entire cartridge line, and engineer and fabricate all our own filter housings and related equipment. During production, we continually monitor the quality of our products, to exacting specifications.

So you won't have to worry if a roll of felt is finished properly, or how strong our filter bag seams are. • As a one-source supplier, FSI uses integrated technologies to ensure that all facets of liquid filtration are as efficient as possible, and that all our components meet FSI's high quality expectations. • We stand behind every product with our name on it. FSI is ISO 9000 Certified, and has over 25 years of full-line filtration product experience. Our engineers can even create special-use filters and vessels, to meet whatever product flow and quality controls you require. • So when you need anything for your liquid product line, think of FSI. We give you just what you asked for – and a whole lot more.
